Przemysław Kamiński

Senior Full-Stack & AI Engineer

Python · .NET / C# · React / Angular / TypeScript · Azure · LLM & Agentic AI

Forward-Deployed Engineer — building software and integrating applied LLM & agentic systems directly with clients (US, remote-first)

Email: kaminski.przemyslaw@hotmail.com | Phone: +48 730 441 993
Location: Wrocław, Poland (remote) | GitHub: github.com/przemo098

SUMMARY

Senior full-stack engineer with 11+ years of commercial experience across financial services, fintech and vertical SaaS/ERP. Owns delivery end to end — gathering requirements directly with clients, designing the architecture, implementing, and presenting to management — as a self-sufficient engineer without separate analysts. Currently shipping production LLM and agentic AI (RAG, multi-agent orchestration, MCP) integrated into a vertical ERP, on a deep .NET / C# / React / Python stack.

Delivered in regulated, mission-critical environments (Point72, Credit Suisse, BNY Mellon, BIS, Danske Bank), across domains including mortgage & credit, trading and risk reporting — a strong fit for finance-adjacent and accounting-heavy products.

TECHNICAL SKILLS

Languages: C#, Python, TypeScript, JavaScript, SQL, Java, HTML, CSS, YAML

AI / LLM: LLM application engineering, RAG, semantic search, agentic / multi-agent systems, tool calling / function calling, structured outputs, embeddings, fine-tuning, prompt engineering; LangChain, LangGraph, Semantic Kernel, Claude Code agents, MCP / FastMCP; OpenAI, Anthropic (Claude), Azure OpenAI; vector search — pgvector, Azure AI Search; document AI — Azure AI Document Intelligence, Azure AI Vision (OCR); evaluation & observability (LLMOps) — LangSmith, Arize Phoenix

Python: FastAPI, Pydantic, async / asyncio, Celery, Django, Jupyter, Sentry

Backend (.NET): .NET 10 / .NET Core, ASP.NET Web API, Entity Framework, Dapper, LINQ, gRPC, SignalR, CQRS / MediatR, MassTransit, Serilog, Blazor, Azure Functions / Service Bus, microservices, REST, OAuth2 / OpenID

Backend (JVM): Java, Java EE, Spring / Spring Boot, Hibernate, microservices, REST

Frontend: React, Hooks, Redux, Redux-Saga, NgRx, RxJS, MobX, Angular, Next.js, TypeScript, Tailwind, Webpack, Three.js, WPF

Cloud & DevOps: Azure, AWS, Docker, Kubernetes / OpenShift, Terraform, Azure DevOps (CI/CD, YAML pipelines), GitLab CI, Jenkins, Nginx, n8n, PowerShell

Data & messaging: SQL Server, PostgreSQL, TimescaleDB, MongoDB, Elasticsearch, Redis, Kafka, RabbitMQ

Testing: Cypress, Playwright, Jest, Jasmine, Karma, xUnit, NUnit, Moq, NSubstitute, SpecFlow

Practices: OOP, DDD, TDD, BDD, Event Sourcing, MVVM / MVC, Agile (Scrum, Kanban), CI/CD, code review, technical leadership

Finance domain: Financial services, capital markets, fintech, accounting systems, risk (FRTB, Basel III, CVA), repo trading — regulated, mission-critical delivery

WORK EXPERIENCE

Full-Stack & AI Engineer — Innergy (vertical ERP, woodworking) 11.2024 – present

Client-facing delivery for a US-based ERP vendor. Acting as a self-sufficient engineer: gathering requirements directly with clients, implementing features and presenting to stakeholders without separate analysts. Reusing and integrating AI/LLM models into accounting and operational modules, deployed at client sites.

- Migrated the front end from Angular to React; built new product features and owned architecture decisions.
- Built AI/agentic capabilities into the ERP (chatbots, automation, LLM-assisted workflows) and shipped them to production at client sites.

Stack: React, TypeScript, Three.js, C#, ASP.NET, microservices, Azure, GitLab CI, Python (async, FastAPI, Celery), LangChain, LangGraph, RAG, embeddings, pgvector / Azure AI Search, FastMCP, Claude Code agents, Semantic Kernel, OpenAI / Anthropic / Azure OpenAI

Consultant — Full-Stack Engineer (Macro) — Point72 11.2021 – 09.2024

Repo Trading Client (RTC), Advanced Margin Project (AMP) and Broker Strategy. Migrated legacy .NET Framework systems to .NET 8 and built new applications end to end, including UI/UX. Gathered requirements, guided management, ran code reviews and mentored developers.
Stack: React, Hooks, Redux-Saga, TypeScript, Formik, Glue42, Cypress, ASP.NET, Entity Framework, Java, microservices, OpenShift, Docker, Terraform, Azure DevOps (CI/CD, YAML pipelines), PowerShell

Consultant — Full-Stack Engineer — Danske Bank 11.2019 – 11.2021
eDoc — automation of a document-management system to reduce manual effort and operating cost. Full-stack delivery of new workflows (UI/UX through to backend and data), enhancements and maintenance.
Stack: C#, ASP.NET, React, TypeScript, Python, Django, Java, Spring, Hibernate, microservices, OpenShift

Consultant / Lead Developer — Credit Suisse — FRTB CVA 06.2019 – 11.2019
Fundamental Review of the Trading Book (Basel III regulatory directive). Designed and implemented fully automated risk calculation across trades (equities, options, FX). Gathered requirements and presented to stakeholders.
Stack: React, Redux, TypeScript, RxJS, ASP.NET, Java, Spring, Hibernate, SQL Server, Entity Framework, TFS

Full-Stack Developer — Web Apps — Bank for International Settlements (BIS) 07.2018 – 03.2019
Confidential security systems, ERP and data hubs (Switzerland). Enhanced existing workflows (access / document management) and built new flows end to end with UI/UX.
Stack: C#, ASP.NET Web API, Microsoft Workflow Foundation, React, Angular, Redux, NgRx, Quartz, Entity Framework, SQL Server, queues, Python, Django, SpecFlow, Moq, NUnit, TFS

Specialist Developer (Vice President) — BNY Mellon — Praeeo 01.2018 – 07.2018
Green-field project on internal cloud with microservices in Docker containers.
Stack: .NET Core 2, Java EE, Hibernate, Kafka, EF Core, SQL Server, xUnit, NSubstitute, Angular 5, Redux, NgRx, AgGrid, TypeScript, Jenkins

Lead Developer / Full-Stack Architect — NaviBud (construction SaaS startup) 03.2017 – 07.2021
Own company. Led architecture, technology selection and a small team to deliver a CRM that automates the sales process for the construction sector. Implemented requirements, ran code reviews and mentored developers.
Stack: Angular, Redux/NgRx, ASP.NET Core, Entity Framework, SQL Server, Azure, Docker, Nginx, Java/Spring Boot, Python/Django, Terraform, Azure DevOps

Earlier roles

- Credit Suisse — Technical Analyst, Market Data Server (04.2016 – 07.2017): React, C#, ASP.NET Web API, Elasticsearch, WPF/MVVM, Python, R (ML for trading data).
- Valentinite — Backend Developer (08.2017 – 12.2017): .NET Core 2, Elasticsearch, PostgreSQL, AWS, ActiveMQ, React.
- Ceneo.pl — Developer (01.2016 – 03.2016): Poland's largest price-comparison site. ASP.NET MVC, Elasticsearch, MongoDB, Redis, SQL Server, RabbitMQ.
- Unit4 — Software Engineer (07.2015 – 12.2015): Agresso ERP — C# .NET, SQL Server, NUnit (80% test coverage).
- Volvo IT — Internship (06.2014 – 09.2014): Java, JSF, XML.

EDUCATION

Wrocław University of Science and Technology — BSc Teleinformatics + MSc Informatics (Internet Engineering), 2012–2017
Award: 1st prize, Team Engineering Competition (multiplayer web game built for Capgemini) — architect / developer / team lead.

ADDITIONAL

Languages: Polish (native), English (C1+), Spanish (A2)
Other: Driving licence (B), yacht skipper. Interests: markets / stock trading, macroeconomics, cooking, guitar.
